Program Loader App.

## Contents.

Purpose

This page app allows users to load an application when an Acquire page is shown. Once the application closes Acquire will move to the next page. Optionally the application can also be terminated when the page closes.

This will also launch the associated application for files. For example if you had the PowerPoint viewer installed then choosing a PowerPoint file will cause the viewer to be launched full screen.

Configuration

1. The file name of the application or document to load. Press the **...** button to select a file.

2. Reset the page timeout when the mouse is moved or clicked. This will keep your page open while the application is being used.

3. Terminate if the screen is blank e.g. the final page of a PowerPoint presentation.

4. When the application exits, one of the following can be chosen:

    - Restart the application.
    - Jump to the specified Acquire page. Press the button to select a page.
    - Time out the page.
    - Quit the page.

5. Press OK to save the configuration and close the dialogue. Press Cancel to close the dialogue and lose changes.
